<b>0.46</b>	<b>60</b>	
<small>Manufacturer stipulates that these ratings conform to applicable NFRC procedures for determining whole product performance. NFRC ratings are determined for a fixed set of environmental conditions and a specific product size. NFRC does not recommend any product and does not warrant the suitability of any product for any specific use. Consult manufacturer's literature for other product performance information. www.nfrc.org</small>		

### Amount of Tax Credit

- ✓ The **maximum** amount for the Energy Efficiency Tax Credit is \$1,500.
- ✓ The amount of the tax credit equals 30% of the homeowner's cost of the product.
  - Example A: Product Cost = \$2,500, Tax Credit = \$750
  - Example B: Product Cost = \$5,000, Tax Credit = \$1,500
  - Example C: Product Cost = \$10,000, Tax Credit = \$1,500

***Energy efficient windows and doors save money on your heating and cooling bills...and now on your taxes, too!***

### How do I file for the Energy Efficiency Tax Credit?

1. Install qualifying products beginning January 1, 2009 through December 31, 2010 and meet all other requirements outlined in the federal tax code.\*\*
2. The IRS form for requesting the Energy Efficiency Tax Credit is IRS form 5695 (2009 version) which will be available in late 2009 or early 2010.
3. Obtaining a Manufacturer's Certification Statement is a requirement by the IRS in order to file for your Tax Credit. This document can be downloaded from our web site at [www.thermalindustries.com](http://www.thermalindustries.com). Other supporting documents that should be saved (but not required by the IRS) are a sales contract, invoice and the window or door product performance labels (NFRC\*\*\*/ENERGY STAR® label). NOTE: the tax credit is for the cost of the product only, *not* installation.
4. Claim the tax credit associated with your qualifying purchase on your Federal filing for the 2009 and/or 2010 tax year. Please note, the entire tax credit can be for windows.
